Paradise, Pa.

Dear Friends:

There are many desirable attainments to work and strive for during a normal lifetime—health, knowledge, friends, religious faith—riches, perhaps—but without one thing, nothing else is of full value. That precious commodity is Peace of Mind.

The world today has just passed through a disastrous war which has left deep and bitter scars. Officially peace has been declared, but actually there is little peace anywhere and never will be until man has first learned to be at peace within himself. The frictions and discontent of individual everyday living grow into larger frictions of whole countries, stirring up turmoil and more wars.

You may ask what all this has to do with seeds and gardening but, believe me my friends, there is a direct connection. Life has grown too complicated—the servants man has created to serve him and provide comforts have become the mechanical masters—our lives are too filled with feverish and restless activities. A return to the simple things, with time to work, time to play, and time to rest, in short a well-balanced life, is essential if we are to survive. And this is where gardening enters the picture. For gardening is more than a peaceful and soul-satisfying occupation or hobby. It is an activity as natural and fundamental to mankind as breathing.

We think it is no longer necessary to point out that a garden pays big returns by providing good nourishing food cheaply, and even greater benefits in health and exercise. The war years taught us that. Now we ask you to continue to raise a garden—vegetables for food, flowers for beauty—and let the simple joy of working in the soil help to bring to you, an individual—Peace of Mind.

Sincerely,

S. Andrews Frew

Our Guarantee

Good Luck Seeds are fresh seeds, carefully tested for germination strength and guaranteed to be true to name. If any packet fails to give you the results you expect, we will refill your order or refund—any time within a year—the full amount paid us for the seed. We know our seed will grow if planted and cared for under good conditions but weather and soil can also influence crops so in no case shall we be responsible for any amount beyond the sum you actually pay us for the seeds.

Novelties for your 1947 Garden

STRAWBERRY CORN

Amusing! Colorful! Different!

This was one of the hits of the New York Flower Show for 1946, and we predict it will become a very popular subject for fall decorations. It is really a "Pop Corn" and a very good one too, but its main charm lies in the beauty of the tiny ears which are only 2 inches long and 1½ inches wide and are a rich and shiny mahogany color, not unlike a gigantic strawberry. These are enclosed in straw-colored husks which may be bent back showing the ear. Wonderfully effective for winter bouquets. Make money for your club or farm fair by raising this novelty to sell. No. 705, Pkt. 25c.

All America Silver
Medal Winner for 1946

ALL DOUBLE PETUNIA *Colossal Shades of Rose*

The largest double petunia ever developed, with magnificent flowers growing over 5 inches across and full double with deep ruffled edges. The colors range from a salmon pink through shades of rose-pink to a dark rich rose mauve. Plants are strong growing, 20 inches high, bearing their immense blooms in great quantities. Spectacular for beds, borders, window boxes and cutting. No. 2701 (100 seeds) \$1.00.

STRAWBERRIES FROM SEED

Everbearing Baron Solemacher

A lovely novelty for planting in pots or along borders of vegetable and flower gardens. The runnerless plants flower within eight weeks of seeding and produce great quantities of fruit throughout the season. Berries are 3 times the size of wild berries and have a delicious sweet flavor all their own. Be the first in your locality to grow this unusual discovery. No. 2648, Pkt. 35c.

Almond Nuts

Think of raising nuts without a tree! These tubers grow close to the surface and are very prolific. They have a thin shell, covering snow-white, delicious meat which has a sweet flavor very much resembling an almond. Plant like potatoes and harvest the same time. *Because of State Law Almond Nuts cannot be shipped to California.* No. 035, Pkt. 10c; ½ lb. 25c; lb. 40c.

LARGE GREEN GLOBE ARTICHOKE

A Decided Delicacy

Grown and highly esteemed for its edible uniquely flavored, large flowering heads. Quite different from the Jerusalem Artichoke which is grown for its tuberous roots. You can grow this increasingly popular French delicacy in your own garden. No. 380, Pkt. 10c; oz. 45c.

New Rust Proof "Mary Washington"

ASPARAGUS

Cut asparagus raised from seed lightly the third year and regularly thereafter. Mary Washington produces shoots which are thick, straight, dark green with fine flavor. Heavy yielder and highly resistant to rust. No. 100, Pkt. 10c; oz. 20c; ¼ lb. 60c.

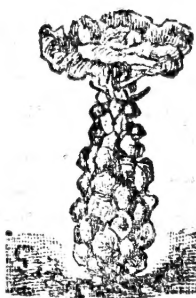

Italian Green
Sprouting

Broccoli—Calabrese

Here is one of the newer vegetables which is becoming more popular every year. It is cultivated the same as cauliflower which it resembles. The bluish-green heads are ready in about 90 days and small heads grow after the main head has been cut. One oz. of seed will produce about 1500 plants; 6 ozs. will plant an acre. No. 403, Pkt. 15c; ½ oz. 40c; oz. 75c.

Brussels Sprouts

Improved Long Island. Stalks grow 20 inches high and are completely covered from top to bottom with tiny cabbages more tender and delicious than any other member of the cabbage family. Perfectly hardy, early frost improves them. An oz. will sow about 400 feet of row. Set plants 18 inches apart and break leaves from stem to promote better growth of heads. No. 121, Pkt. 15c; ½ oz. 50c; oz. 90c.

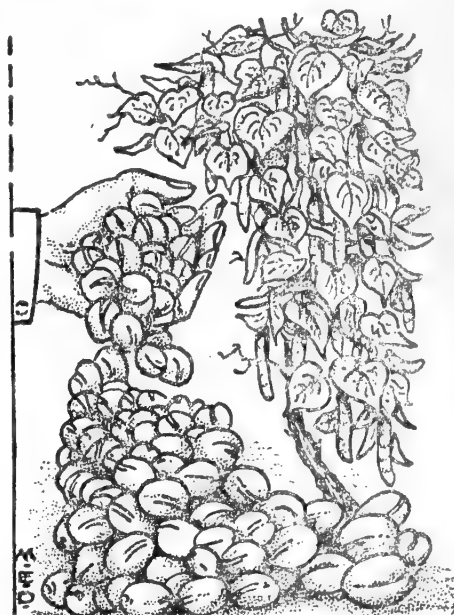

TAMPALA

Tampala is different from any vegetable you've ever eaten. It is far superior to spinach in every way, possessing a delicate flavor all its own. The leaves are carried high on the 2 ft. plants and remain free from the grit and sand which is so distasteful in spinach. It bears well in hot weather, remaining tender and mild over a long growing period. Most people who have tried it prefer it to all other greens and we believe it is destined to become one of the most popular of vegetables. *Recipes sent upon request.* No. 685, Pkt. 15c; ⅛ oz. 45c; ¼ oz. 75c; oz. \$2.00.

GREEN BUSH BEANS CULTURE. *May be planted any time from May 1 to August 1, and do not require very rich soil. Sow 2 lb. per 100 ft. of row, rows 18 in. apart, the beans 2 to 4 inches apart and 1 to 2 inches deep. A succession of plantings every two weeks will provide a constant supply of fresh beans for the table.*

EDIBLE SOY BEAN --- Bansei

The Vegetable of the Future! Truly the soy bean "has everything"! It is delicious when eaten green or dry—grows everywhere and produces abundantly. Best of all it is an excellent source of Vitamins A, B and C and contains enough protein to make it a good substitute for meat. Our variety is one of the earliest and most productive of all and will yield huge crops in nearly every section of the country. Plants grow 24 inches high and are literally loaded with pods. Seeds are bright green when young and yellow when mature. We will supply recipes upon request. No. 123, Pkt. 10c; ½ lb. 25c; lb. 45c; 5 lb. \$2.00.

PLENTIFUL

All-America Bronze Medal Winner

A superb green pod bean similar to Bountiful but with larger, thicker, and more tender pods. Heavy yielder, stringless, and rust resistant. Black seeded. No. 702, Pkt. 15c; ½ lb. 30c; lb. 50c; 5 lb. \$2.00.

Kenny's Green Podded

REFUGEE

Green Stringless

53 days. One of the best general purpose beans. Used for home, market, canning and freezing. Pods are medium green, round, very fleshy, stringless, fine grained and tender. Plants vigorous and productive. Seeds light coffee brown. No. 126 Pkt. 10c; ½ lb. 25c; lb. 45c; 5 lb. \$2.00.

BOUNTIFUL
